## Horses

### HoofPro

Horses hooves are exposed to high levels of concussive impact and are susceptible to infection. HoofPro supports a strong, healthy hoof by nutritionally stimulating protein synthesis and cellular function and thereby assisting in faster growth of hoof tissue.

**Ingredients:**

Golden flaxseed, Organic mushroom powder - 5 species, Gluten free oat - beta glucan, Saccharomyces cerevisiae (CNCM) I-1077 (20 billion CFU per 40g serving), Alkosec R397.

RRP: £45 for 900 g

### Omega Complete

Omega-3 fatty acids EPA and DHA are important fatty acids for humans and their animals because they cannot be made in the body. The only source of ALA, EPA and DHA is through diet and/or supplementation. Daily supplementation with Omega-3 Fatty Acids helps support optimal health for your horse.

The omega-3 fatty acids (ALA, EPA and DHA) help support:

- Cellular health
- Improved skin and coat
- Reproductive benefits
- Improved bone formation
- Anti-inflammatory effects

**Ingredients:**

Golden Flaxseed (ALA), Omega 3 TG (EPA+DHA).

RRP: £49 for £900g

### CHARGED

1.5kg

CHARGED is scientifically formulated to replace -- in the proper balance -- the important and essential minerals lost in sweat during exercise and transport: chloride, sodium, potassium, calcium and magnesium, together with fuel for cells in the intestinal system that absorb water and minerals (dextrose, fructose).

This concentrated product assists in metabolic balancing, providing targeted nutrition to meet your horses' needs.

**Ingredients:**

Sodium chloride, Potassium chloride, Calcium-citrate tribasic, Magnesium sulfate, Dextrose, Fructose, Silicon dioxide, natural lemon flavour.

RRP: £19.50 for 1.5 kg
